

## Mayor's report for June 2<sup>nd</sup> regular meeting of Council

I hope everyone is enjoying this unseasonably warm weather we are having, I can not remember the last time I planted by raised beds on May 10, but I love it. With the warm weather and dry conditions comes the risk of forest fires, so we all should take extra care when camping.

I met our newest R.C.M.P. member Cst. Karina Watson, she was extremely happy with this posting and is looking forward to moving here, she is expected to be here late July sometime.

The graduation ceremony and dinner was wonderful, it was held outside in the green space, there was a live band, lots of laughs and tears as we congratulated Dustin Grantham and Riley Wilson on their successes and best wishes for each of their futures.

Council met last Monday evening to go through the candidates for our CAO position, we short listed 5 candidates and have contacted them and let them know that they have been selected to move into the next stage, after that we will again screen them and move into interviews, it is a slow process but council is trying to ensure we go slowly and search out the very best person for our community.

I see our Faro Market is happening outside underneath the white tent, hopefully everyone will take advantage of all the great products the vendors are offering, soon to be vegetables for sale as well!

Many people are asking "when are we getting 4G", council was told that we will be having it this June sometime, so we are all looking forward to that for sure.

I encourage everyone to fill out the Faro Food System survey which is part of the feasibility study related to the Community Greenhouse initiative, it is a short survey and everyone's input is valuable to move ahead with the possibility of a Community Greenhouse in Faro.

Thanks to Administration and Council for all their work as usual.
